

BIMDeX

A Unit of SrinSoft Inc

CREO TO REVIT EXPORTER

It is a data exchange tool, creates parametric Revit families from Creo parts and assemblies. All legacy information will be converted - including geometry, parameters, units, materials etc.

BIM DATA EXCHANGE SOLUTIONS

BIMDeX provides a platform for effortless data exchange between various CAD, Design and BIM softwares. BXF is a global standard for data exchange across various industries

An innovation in BIM industry.

An award winning product providing seamless data integration of BIM softwares with mechanical models.

Key Features and Benefits:

- Supports all Metadata information such as Parameters, Colors, etc.,
- The tool supports various industry specific requirements like geometric simplification, parameter data exchange
- Option to filter the required components from the Creo model to export into Revit
- Reduces the design time by more than 70%
- Maintains the Creo assembly hierarchy in Revit
- User friendly and availability of more export options
- Minimizes of design error by more than 50%
