

BIMDeX

A Unit of SrinSoft Inc

SOLIDWORKS TO REVIT EXPORTER

It is a data exchange tool, creates non-parametric Revit families from SolidWorks parts and assemblies. All legacy information will be converted, including Dimensions, Parameters, Family Tables, Material, etc.

BIM DATA EXCHANGE SOLUTIONS

BIMDeX provides a platform for effortless data exchange between various CAD, Design and BIM softwares. BXF is a global standard for data exchange across various industries

An innovation in BIM industry.

An award winning product providing seamless data integration of BIM softwares with mechanical models.

Key Features and Benefits:

- Supports all metadata information such as Parameters, Colors, etc.,
- All Parametric information will be converted including Geometry, Parametrs, Units, Materials, etc.,
- Provides option to specify the nature of export
- Can define the components to be exported
- Optimizes the Geometry of the Model by simplifying to B-rep features
- Provides option to exclude the components of Library, Part/Assemlly, Pattern and Hidden components
- Reduces the design time by more than 70%
- Minimizes of design error by more than 50%
